- 250 micron

BLEED AREA

The bleed area extends out 3mm from the edge of your finished artwork. All images or colours that are required to print to the edge of the document should be extended to avoid the chance of any white lines during the print finishing process.

SAFETY AREA

Avoid putting any text or important information 3mm from the edge of the label or sticker as content placed within this area will run very close to the edge and maybe cut off during the print finishing process.

CUTTING PATH

This is the finished size and cutting path of your label or sticker. Anything placed outside this area will be trimmed off during the print finishing process. Please ensure that a spot colour is used to create the cutting path.
