- Double Sided PVC Banner

**Material weights available**

- 510gsm
- 650gsm
- 720gsm

Variable mm

Variable mm

**BLEED AREA**

The bleed area extends out 3mm from the edge of your finished artwork. All images or colours that are required to print to the edge of the document should be extended to avoid the chance of any white lines during the print finishing process.

**SAFETY AREA**

Avoid putting any text or important information 3mm from the edge of the artwork as content placed within this area will run very close to the edge and maybe cut off during the print finishing process.

**VIEWABLE AREA**

This is the finished size of your document. Anything placed outside this area will be not be visible after the construction of the banner.

**NON PRINTABLE AREA**

This area is needed to reinforce the banner for both durability and to enable the eyelets to be added to the banner. Anything placed inside this area will not be visible.

**EYELET POSITIONING**

This indicates the positioning of eyelets across the banner. Avoid putting any text or important information within 3mm of the eyelets as they maybe obscured during the finishing process.

### HOW TO CREATE YOUR PRINT READY PDF

Please use the following instructions to create your PDF.

File > Export

Format > Adobe PDF >

Adobes PDF Preset > PDF/X-1a:2001 >

Marks and Bleed >

Select "crop marks"

Set all "bleeds" to 3mm
